

Fall Conference

October 29, 2009

De Reehorst, Ede (The Netherlands)

NLUUG

OPEN SYSTEMS, OPEN STANDARDS

CALL FOR ABSTRACTS

The Open Web

The NLUUG Fall Conference is intended to celebrate almost 20 years of web openness. We solicit contributions in the form of talks and workshops. Papers for the conference proceedings are welcomed, but not required. Alternatively, we would like to publish a digital version of your presentation with slide-notes.

Since its conception approximately 20 years ago, the World Wide Web has drastically changed society and the way we communicate. The main contributor for The Web's success is its open character: everyone can participate because the use of Open Standards.

The Open Web is a mix of technologies and concepts. Open web technologies and protocols (i.e. HTTP, HTML, CSS, JavaScript, ...) have carried the WWW to success by implementing decentralization, transparency, extendibility, third party innovation, bidirectional communications, and end-user usability and integration.

Presentation topics include (but are not restricted to):

- **Web programming** *AJAX, PHP, CSS*
- **Web services** *SOAP, XML-RPC*
- **Web security** *XSS, CSRF, Cookie hijacking, Buffer overflows, SQL injection*
- **Browsers** *Firefox, Google Chrome, new Javascript engines*
- **Webserver** *Configuration, Performance, Debugging, Logfile processing*
- **The Mobile Web** *Android, I-Phone*
- **Geolocation / mapping services** *Google Maps, OpenStreetMap, geoclue*
- **Web 2.0 / Mashups**
- **Wikis / Social networks** *Orkut, Facebook, Twitter*
- **Semantic web**
- **Internet of Things**
